

# Introduction to CFD (Computational Fluid Dynamics): Simulation of Ventilation for Gamonepwint Market

Shwe Myat Myo Oo  
Winter ACMV

# Introduction

## SPEAKER BACKGROUND

**2012-2016**

Bachelor of Science in Mechanical  
Engineering (B.S.M.E)

Certificate in Entrepreneurship

**2017-2019**

Lead Engineer, Technical  
Development Division

**2019-2021**

Northeastern University

Master of Science in Energy  
Systems (MS-ES)

The American Society of Mechanical Engineers  
Founded 1880

This Certificate is Awarded to

**Shwe Myat Myo Oo**

For Successful Completion of  
**Introduction to Computational Fluid Dynamics**

Date Completed: **3/11/2018**  
**2.30** Continuing Education Units

  
Phil W. Hamilton  
Interim Executive Director

  
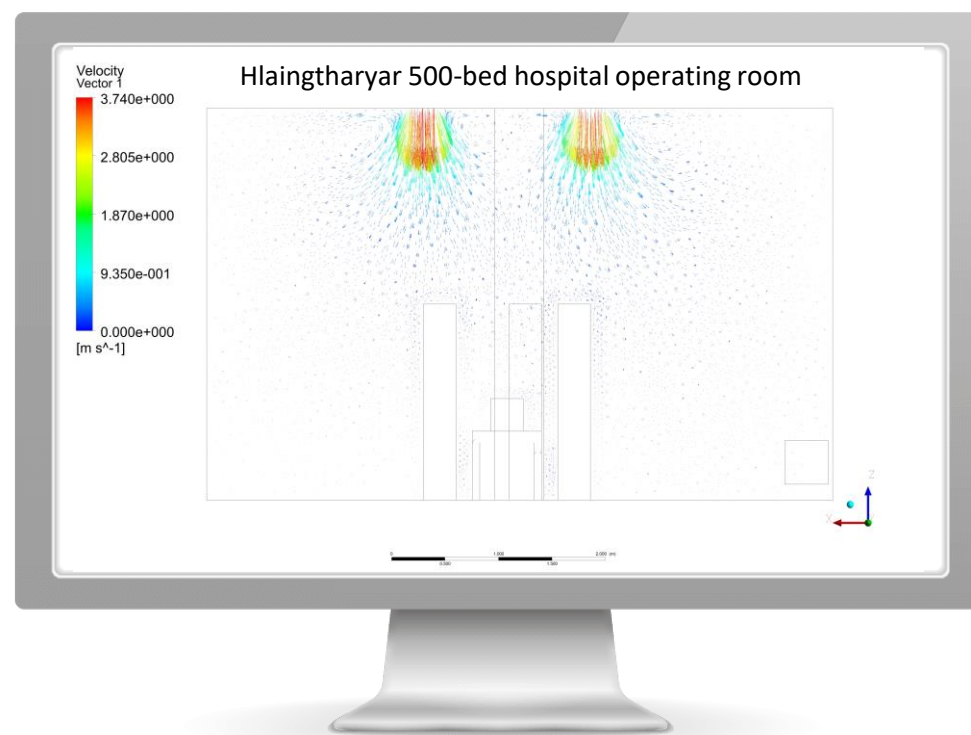

Arin Ceglia  
Director, Learning & Development

ASME Training & Development is accredited by the International Association for Continuing Education and Training (IACET) and is authorized to issue the IACET CEU. As an IACET Accredited Provider, ASME Training & Development offers CEUs for its programs that qualify under the ANSI/IACET Standard.

ASME Two Park Avenue, New York, New York 10016

# WHY CFD?

**COST SAVINGS**

**BROAD  
APPLICABILITY**

**DESIGN COMPARISON**

# CFD For Buildings

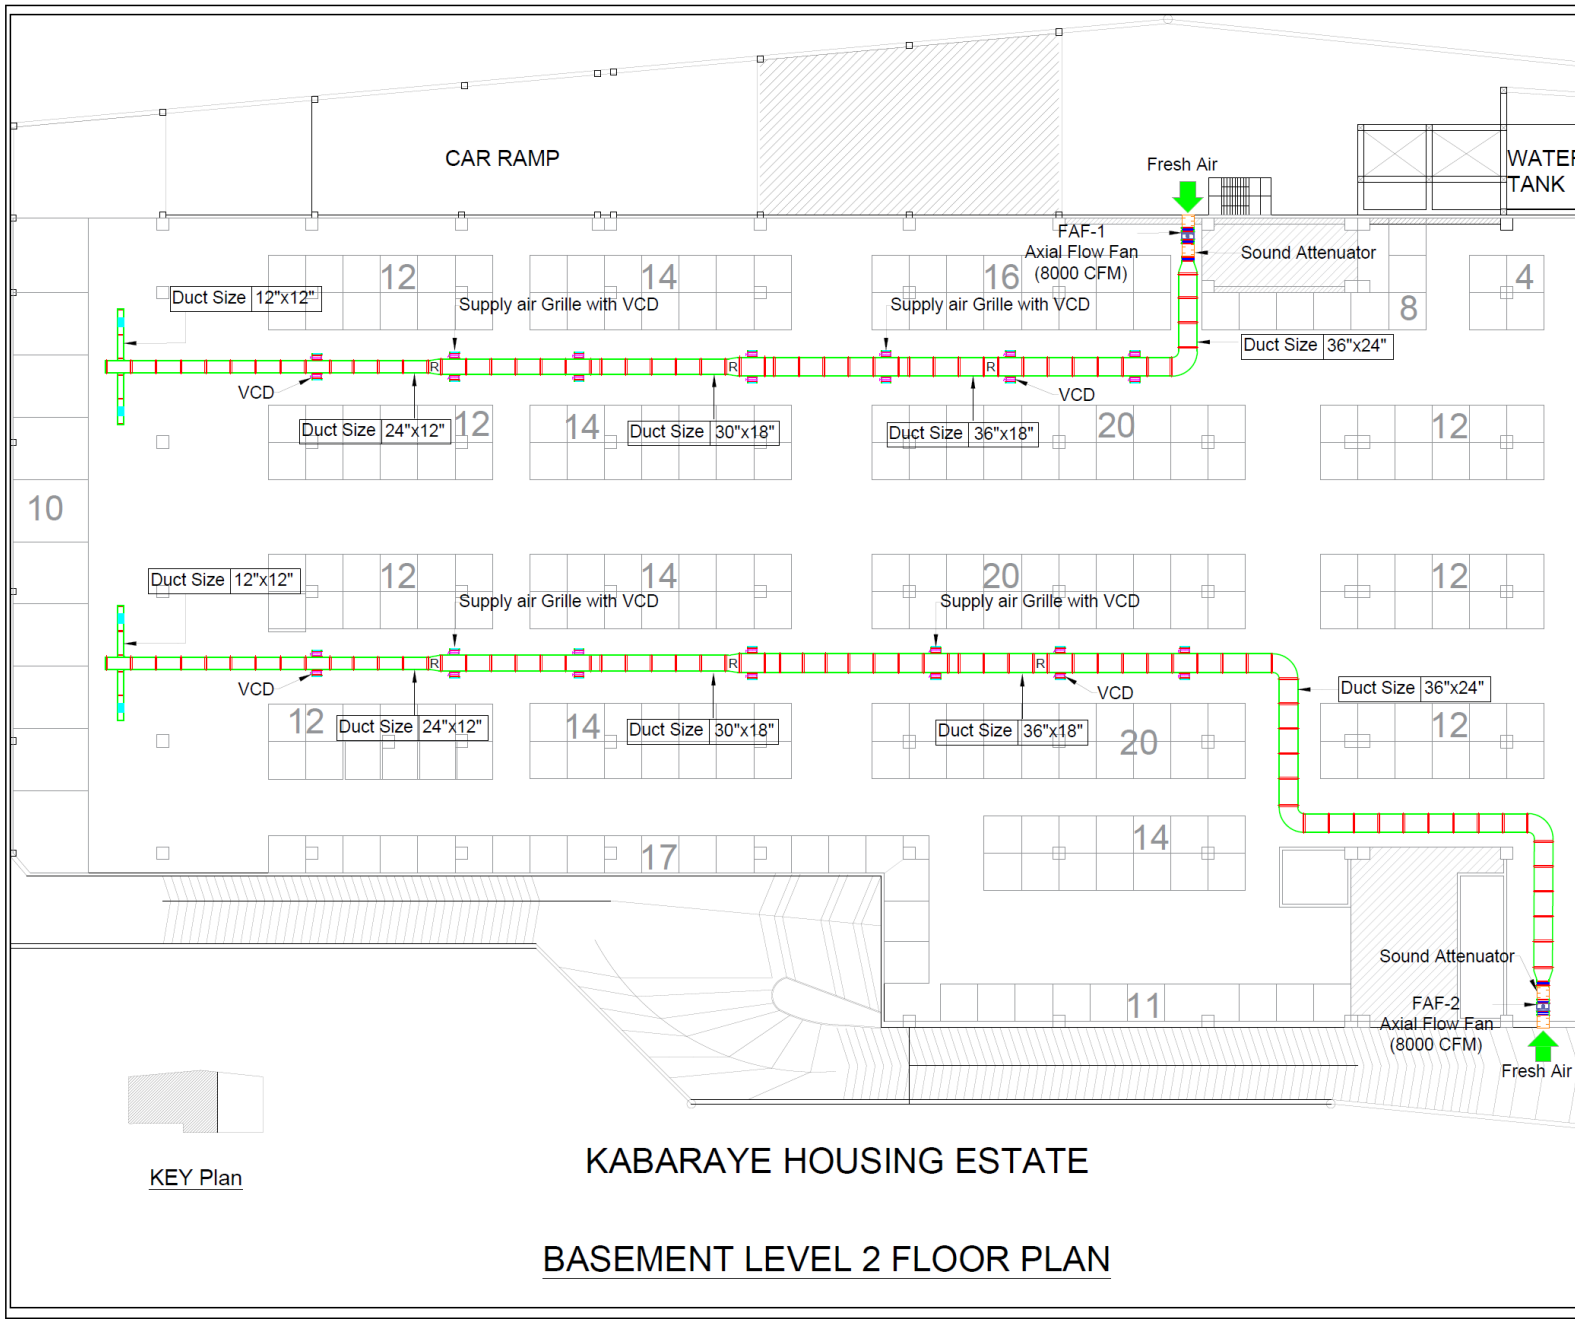

- External aerodynamics (wind load)
- Thermal comfort, ventilation analysis
- Airflow optimization
- Special applications (data center cooling, hospital operating rooms, etc)

# Geometry

APPLICANT		
PROJECT	KABARAYE HOUSING ESTATE	
	BLOCK NO.	
	LOT NO.	
	BAHAN TOWNSHIP	
SUBJECT	Mechanical Ventilation Fan Location and Duct Layout Plan ( Basement-2 )	
SCALE	1 : 220	
DATE	July 2020	
DRAWN BY:	Aung Myint Zaw	
CHECKED BY:	Abel Pwa	
APPROVED BY:	Shwe Yu Kyaw	
DRAWING NO:	MV 01 / KBA / Y2K20	
REVISE NO:		

# 3D Revit Model

# Results

Velocity

# YANGON CLIMATE (MYANMAR)

Weather data source:  
<https://en.climate-data.org>

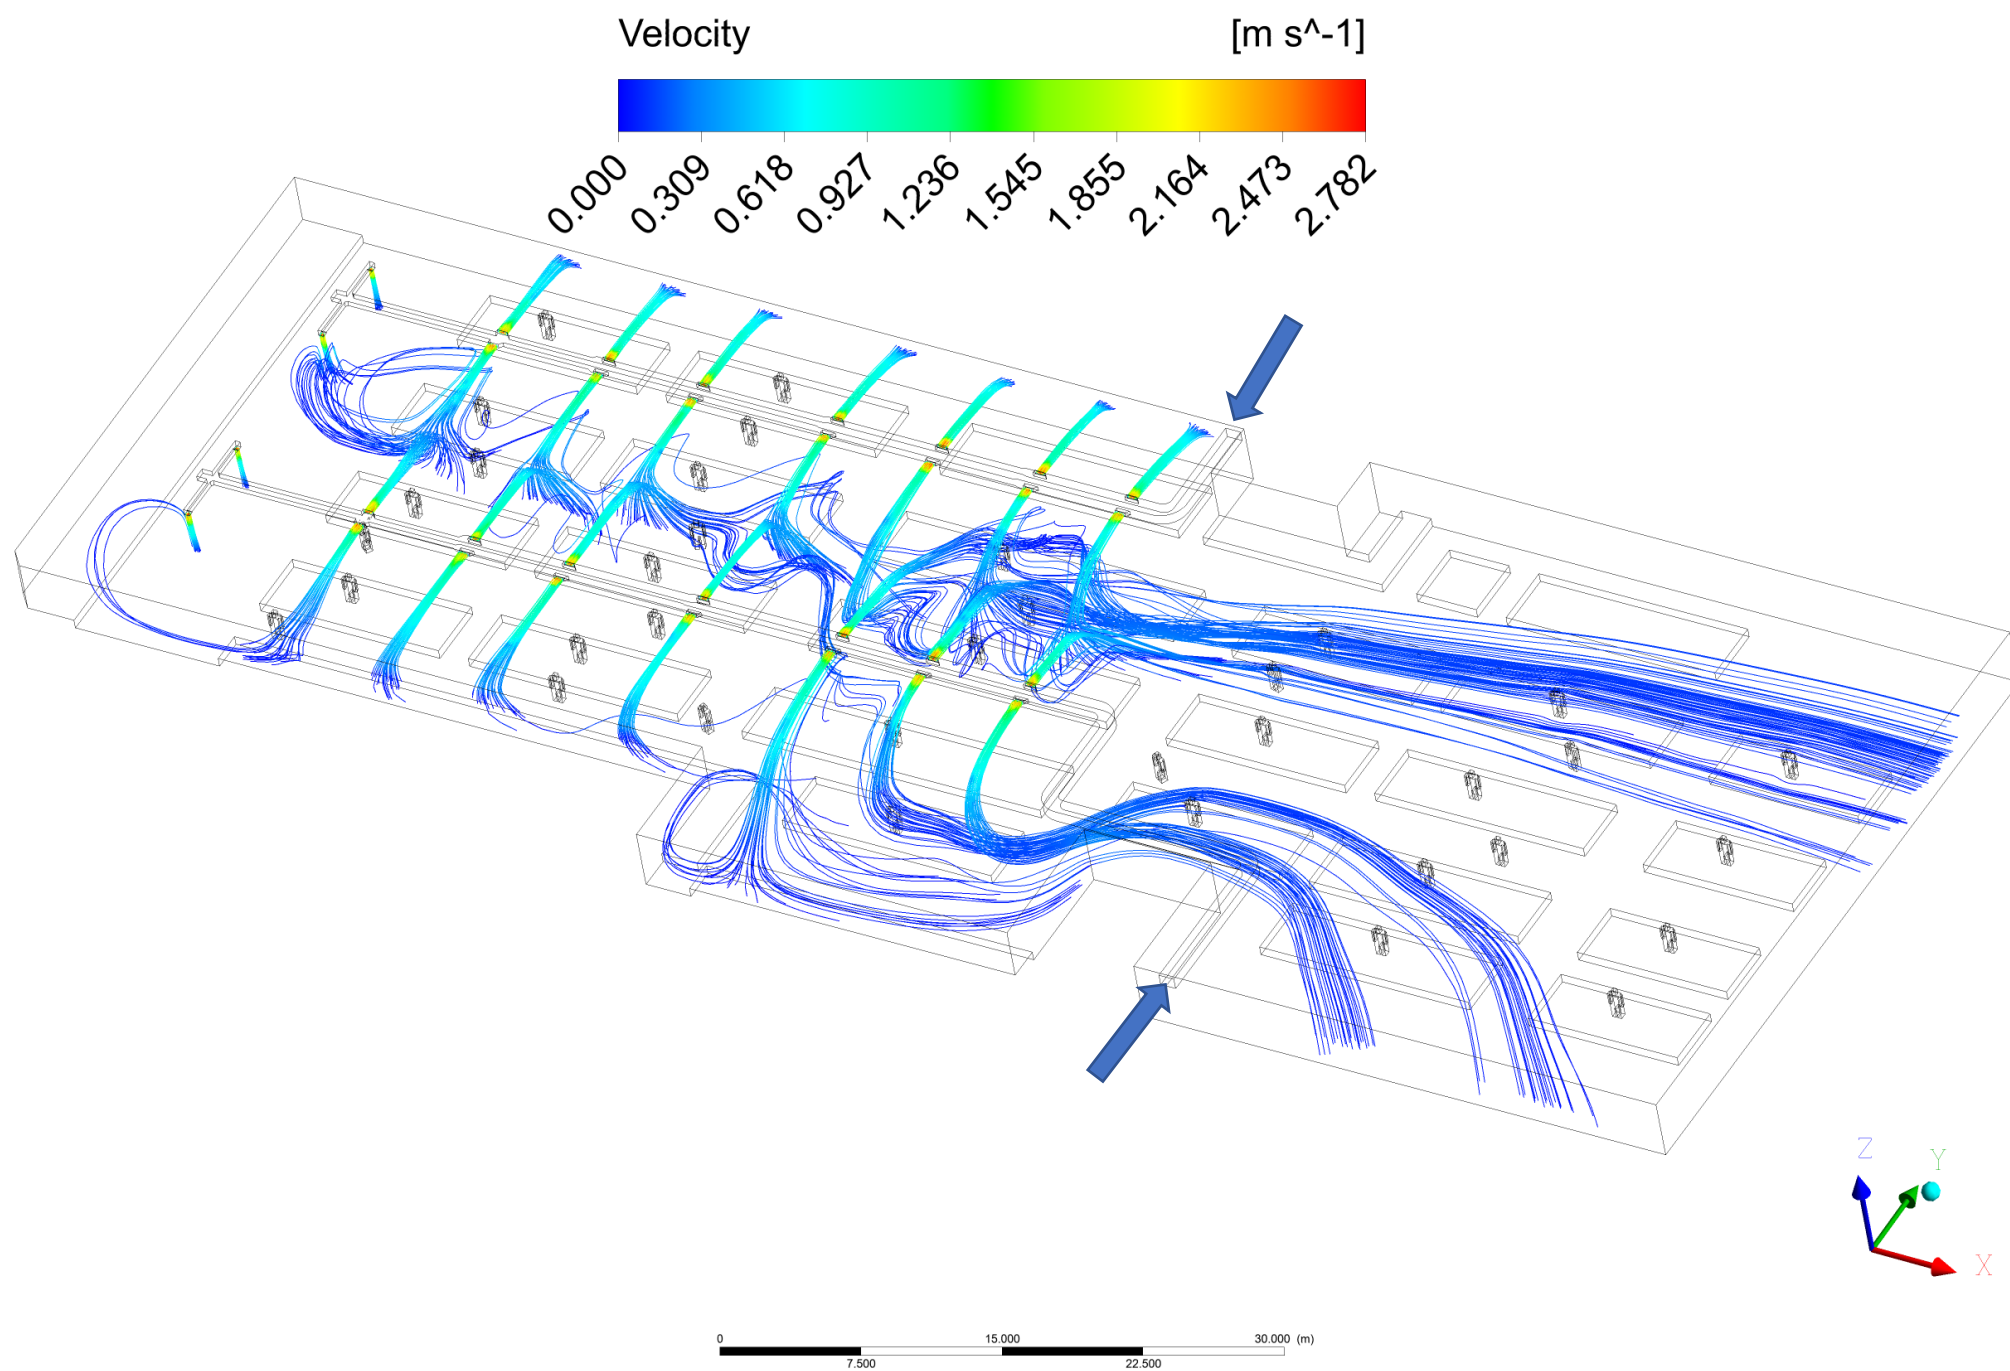

Temperature [C]

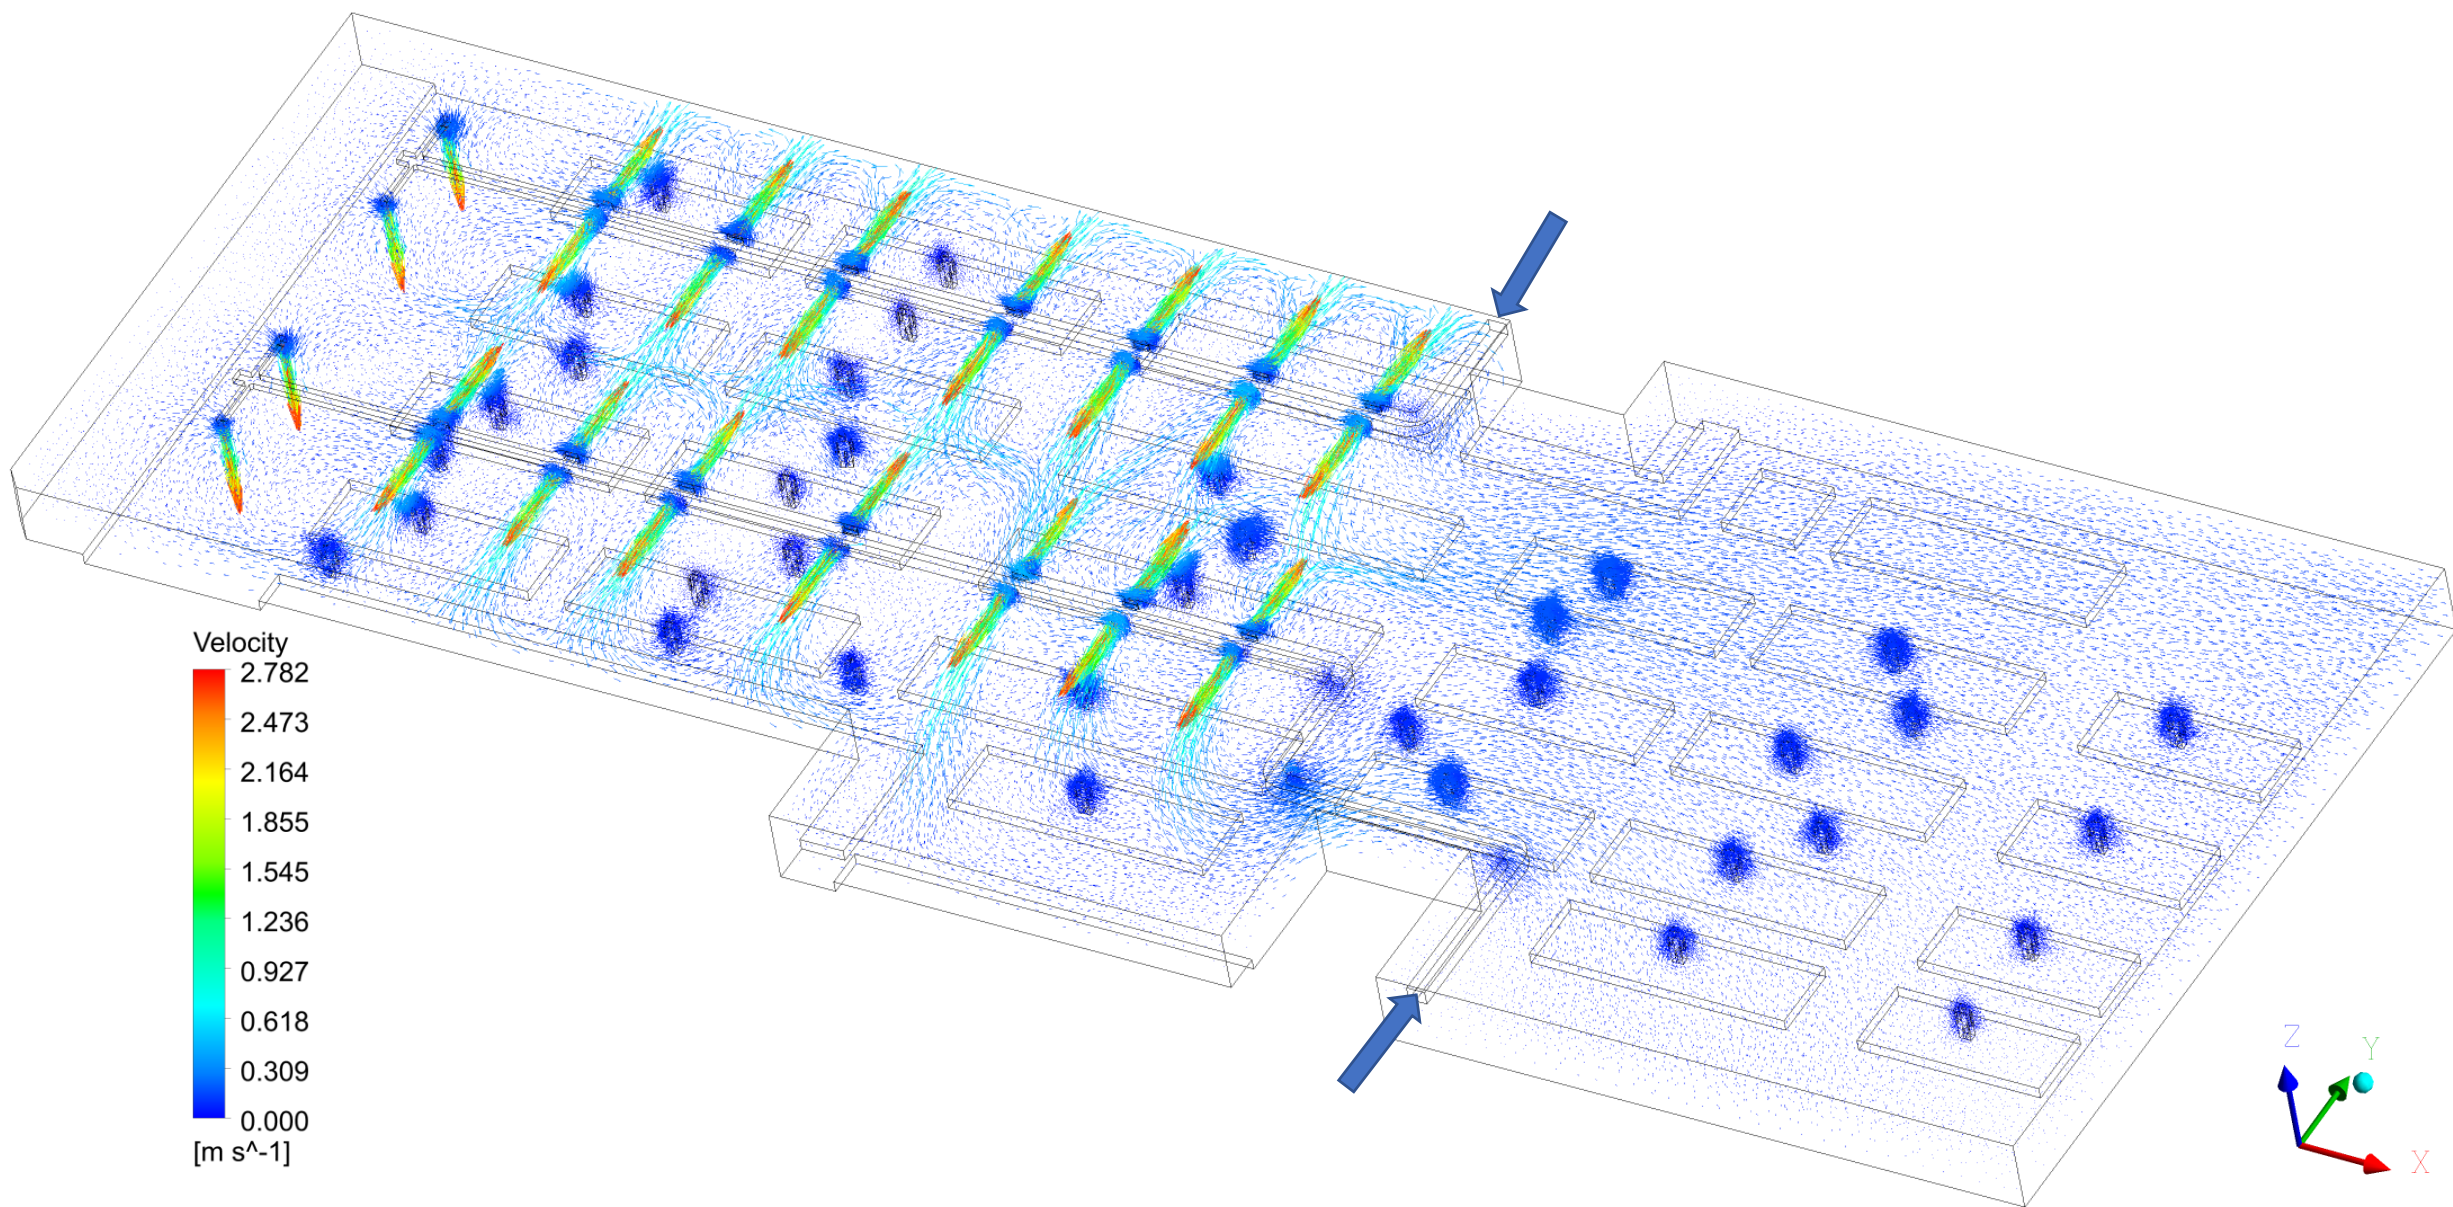

Velocity [m s<sup>-1</sup>]

# Thank You

# WHAT IS CFD?

## How Does CFD Work?

**ANSYS CFD solvers are based on the finite volume method**

- Domain is discretized into a finite set of control volumes
- General conservation (transport) equations for mass, momentum, energy, species, etc. are solved on this set of control volumes

$$\underbrace{\frac{\partial}{\partial t} \int_V \rho \phi dV}_{\text{Unsteady}} + \underbrace{\oint_A \rho \phi \mathbf{V} \cdot d\mathbf{A}}_{\text{Convection}} = \underbrace{\oint_A \Gamma_\phi \nabla \phi \cdot d\mathbf{A}}_{\text{Diffusion}} + \underbrace{\int_V S_\phi dV}_{\text{Generation}}$$

- Partial differential equations are discretized into a system of algebraic equations
- All algebraic equations are then solved numerically to render the solution field

Equation	$\phi$
Continuity	1
X momentum	$u$
Y momentum	$v$
Z momentum	$w$
Energy	$h$

# CFD IS MULTIDISCIPLINARY
